Sep 14, 2022 Version 4.1.0 ver4.1.0 - New Gunpla Parts and AI Pilots - Bug fixes I have been really enjoying the game. Later into it though there are a couple small tweaks I would make. I would also like an easy way to message developers (for instance my once a day free coupon says it's available in 1803 days and 19 hours). With that said, I did not know how to level up skills of equipment until day 10 of playing when I did it on accident (you use the same equipment to upgrade itself). I want more streamlined thinking in the parts section. Like when I go to upgrade and select parts I want the same equipment to come up first. Sorting by rarity or name takes time now that I have to scroll through everything. I would like the shop (capital in particular) to say whether or not I already have that specific item. Otherwise I am going to my collection box and checking the name. Like the other review said, haro chips are getting increasingly harder to come by. With my luck I have been getting mainly the same items (which is fine most of the time) but I am worried that when my storyline bonus haro wears out I won't be able to get ten items in a row more than once a week of playing. All in all this game has been a great time waster and I hope I can build death scythe soon (dk if it's in yet). I would give it a 4 right now but I gave it a 5 because I believe that a lot of these little things will get fixed with time. I really enjoy the new custom skin feature - it's what I have been waiting for a long time! The only thing that bugs me is that some parts I want to keep and some I want to change, to use those parts in a skin I would have to take them off of my actual gunpla making my gunpla considerably weaker. That and the ex skills available are exclusive to what the skin has so I cannot use my powerful parts for their ex skills along with the skin itself. Please gunpla battle team make it so I can mix and match the parts with custom skins and the parts I actually want to keep on my gunpla. What I'm asking essentially is that you let me fill in empty part areas on my custom skins with the actual parts that the gunpla has equipped so I don't have to remove the parts I want to use just to keep their ex skills which ruins my stats and tags. I really love this game and this is the first feedback that I have given because I feel a lot of builders share my sentiment. Thank you again for all your hard work Gunpla team, I really do love your game and want your custom skin feature be everything it was meant to be, a way to cosmetically enhance your gunpla without changing the stats, parts and ex skills that I

DO want to keep on my gunpla. Good game overall, I enjoy gundam and the concept of it all. This game does a good job at letting people immersive themselves into the game. The only issue I have with this game is how glitchy it is at times and the arena. It's the same issue where despite my team having much higher CPWR than the opposing team I still lose because my AI teammates don't do enough work and end up getting killed leaving me to a 1v3. It's like in the end CPWR doesn't even matter it's just the matter of who gets EX skill first that's all. And most of the time the enemy team gets their EX skill before i do. There should be a better way to counter enemy EX skill other than using your own EX skill right after they use theirs. It's just a dumb and pointless mechanic that leaves players at a huge disadvantage. Another issue is that there should be an improvement in combat. Controls feel unresponsive at times and sometimes am unable to shoot while moving my mech. And fix the targeting system. prioritize targets that are closer to you and should not have to be so hard to get. I would say the best way to improve that would be to allow either horizontal camera access or point and click enemies instead of relying on the lock-in. Lastly, add a buy all function or buy what is selected function in the capital shop. It'll make things much easier.
